

## RescueNet® Live

# Supporting Your Telehealth Needs

Telehealth solutions are becoming increasingly critical in the global healthcare environment. RescueNet Live from ZOLL® allows clinicians to remotely view real-time data from the X Series® Advanced monitor/defibrillator screen via a cellular or WiFi connection.

ZOLL's RescueNet Live telehealth solution allows providers access to:

- Top 4 waveforms\*
- Heart rate
- Non-invasive blood pressure
- EtCO<sub>2</sub> values
- Masimo rainbow® SET® parameters
- Invasive blood pressure
- Temperature

Providers will also have visibility into:

- Trends
- 12-lead snapshots
- Alarms
- Patient demographics
- Gallery view of multiple streams
- Multiple users connecting to a specific stream
- Playback of transmission stream

RescueNet Live offers effective decision support to help EMS organisations meet their telehealth needs.

As telehealth programs continue to help improve patient care, providers can rely on RescueNet Live to share the real-time feedback and data necessary to provide optimal care in every situation.
