ADVANTAGES TO CLOUD-BASED SOFTWARE SOLUTIONS

The volume of data that healthcare organizations manage and store increases exponentially every year. By 2025, the compound annual growth rate of healthcare data is projected to be 36%.[1] Anticipating your need to migrate to the cloud to maintain the operational excellence of your systems, ZOLL® offers cloud-based versions of our code data solutions—RescueNet® CaseReview, CodeWriter, and DeviceDashboard—to address your unique and evolving data management needs.

MORE DATA SECURITY

- Migration to the cloud makes it easier to keep pace with changes in the threat landscape.
- Security enhancements and bug fixes can be applied immediately; no need to wait for periodic on-premise updates.

AUTOMATIC SOFTWARE UPDATES

- Automated software updates ensure that your team always has the latest features and enhancements.
- Implementations and upgrades are done in just a fraction of the time, allowing your clinical and biomedical users to get up and running more quickly.

BETTER ACCESS TO DATA

- Cloud-based software provides users with access to the ZOLL code data solutions anytime, anywhere.
- Our solutions are compatible with phones, tablets, and laptops running iOS or Android operating systems.

REDUCED COSTS

- There's no need for additional investment in IT infrastructure, substantially reducing traditional IT costs associated with hardware, software, and services.
- Since cloud computing is scalable, storage and processing capacity expand as needed.

AUDIT-READY

- ZOLL solutions are designed and managed in alignment with best IT security practices and standards, ensuring your team is compliant with Systems and Organizations Controls 2 (SOC2) audits.

ENHANCED COLLABORATION

- Our technical support team, clinical experts, and system engineers can provide immediate advice, technical support, and system status monitoring.

HOW CAN ZOLL PARTNER WITH YOUR INSTITUTION TO HELP YOU TRANSITION TO THE CLOUD?

Whether you are new to ZOLL's software solutions or currently using ZOLL on-premise software, our experts can provide personalized advice to help your team develop implementation plans tailored to your requirements. We offer unparalleled technical and clinical support to optimize your evolving data needs.

CONSULTING   DEPLOYMENT   SUPPORT

| Specialized technical resources | Scope calls with our resident experts | Design and execution of detailed plans to go live | Deployment according to your timelines and standards | Training for operational excellence prior to going live | Ongoing, real-time supplementary support | Partnership with IT and HCPs that optimizes resources | Best-practice implementation of data-drviden resuscitation and debriefing |

Are you ready to optimize your data solutions?
